Art Unit: 3753

This office action is responsive to communications filed 03/09/2006.

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 03/09/2006 has been entered.

**Claims 1, 3 – 6 and 8 – 14 are pending.**

2. The drawings are objected to because of the defects listed on the attached PTO-948 form. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 11 – 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Yonnet (WO 00/75741).

Yonnet discloses a pressure loaded pilot valve system (Figs. 1 and 3, for example) comprising a pressure loaded pilot valve (20) coupled to a regulator valve (2) that is connecting an inlet line (3) at pressure  $P_i$  and outlet line at pressure  $P_o$ , the pilot valve having a spring (10) that determines the set point of the system and a control

Art Unit: 3753

pressure applied to the pilot valve assembly that opens the pilot valve as the fluid pressure i.e. control pressure increases (See Fig. 2) and the excess fluid pressure being diverted to the outlet. The spring force exerted by the spring (10) is adjustable via the stop nut (11).

The arrangement in Yonnet as set forth above necessarily performs the method recited in claims 11 – 13, in its usual and normal operation.

5. Claims 1, 3 – 6, 8 – 10 and 14 are allowed.

***Response to Arguments***

6. Applicant's arguments with respect to claims 11 - 13 have been considered but are moot in view of the new ground(s) of rejection.
